

CS101 Quiz 11 - Practice

Name _____

1. What does this code print?

```
String a = "Pikachu";  
String b = "pikachu";  
System.out.println(a.equals(b));
```

- A) true
- B) false
- C) Pikachu
- D) Compile error

2. What does this code print?

```
String a = "Eevee";  
String b = "eevee";  
System.out.println(a.equalsIgnoreCase(b));
```

- A) true
- B) false
- C) Eevee
- D) Compile error

3. What does this code print?

```
String s = "The quick brown fox";  
System.out.println(s.contains("quick"));  
System.out.println(s.contains("Quick"));
```

- A) true and true
- B) true and false
- C) false and true
- D) false and false

4. What does this code print?

```
String s = "";  
String t = "Squirtle";  
System.out.println(s.isEmpty());  
System.out.println(t.isEmpty());
```

- A) true and false
- B) false and true
- C) true and true
- D) Compile error

5. What does this code print?

```
String s = "Charmander";  
System.out.println(s.startsWith("Char"));  
System.out.println(s.endsWith("der"));
```

- A) true and true
- B) true and false
- C) false and true
- D) false and false

6. What does this code print?

```
String s = "Game Over";  
System.out.println(s.toUpperCase());  
System.out.println(s.toLowerCase());
```

- A) Game Over and Game Over
- B) game over and GAME OVER
- C) GAME OVER and game over
- D) Compile error

7. What does this code print?

```
String s = "I like cats";  
String result = s.replace("cats", "dogs");  
System.out.println(result);  
System.out.println(s);
```

- A) I like dogs and I like dogs
- B) I like dogs and I like cats
- C) I like cats and I like dogs
- D) Compile error

8. What does this code print?

```
String data = "10,20,30,40";  
String[] parts = data.split(",");  
System.out.println(parts[2]);  
System.out.println(parts.length);
```

- A) 20 and 4
- B) 10 and 4
- C) 30 and 4
- D) Compile error

9. What does this code print?

```
String a = "Jigglypuff";  
String b = new String("Jigglypuff");  
System.out.println(a == b);  
System.out.println(a.equals(b));
```

- A) true and true
- B) false and true
- C) true and false
- D) false and false

10. What does this code print?

```
String s = "Bulbasaur";  
System.out.println(s.startsWith("bulb"));  
System.out.println(s.toLowerCase().startsWith("bulb"));
```

- A) true and true
- B) true and false
- C) false and false
- D) false and true

11. Define "Narrowing":

- A) Automatically converting a smaller data type to a larger one with no data loss
- B) Manually converting a larger data type to a smaller one, which may lose data
- C) Removing whitespace from the beginning and end of a String
- D) Splitting a String into an array of smaller Strings
