

CS101 Quiz 3 - Answers

Covers:

- Anything From **Lab3Variables**
- Assignment Operators: See slides **2/3-User-Input**
- Any word on the CS101 Github [“vocabulary.md”](#) file

During Quiz:

- NO NOTES

Use the code below to answer questions 1 - 3:

```
public class quizCode {  
    public static void main(String[] args) {  
        double a = 5.0;  
        double b = 20.0;  
        a = 3 + (b - a) / 5.0;  
  
        System.out.println(a);  
  
        a += 1.0;  
        a = 1.0;  
        b = b + 2.0;  
    }  
}
```

1. (2pts) If we run this code, what will be printed to the console?

6.0

2. (2pts) What is the value of “a” when the program completes?

1.0

3. (2pts) What is the value of “b” when the program completes?

22.0

4. (3pts) Define the following for the line of java code:

```
int month = 2;
```

Variable name:

month

Variable type:

int

Initialization value:

2

5. (1pts) Which of the following best describes **Assignment** in programming?

A) Defining a variable's name and type, with or without an initial value

B) Giving a variable a value using the equals sign (=)

C) The initial value given to a variable when it is first created

D) Increasing a variable's value, usually by 1
