

CS101 Quiz 4

Name: _____

```
import java.util.Scanner;
public class quizCode {
    public static void main(String[] args) {
        Scanner scan = new Scanner(System.in);
        System.out.print("Enter the cost: ");
        double cost = scan.nextDouble();
    }
}
```

1. (2pts) You compile and run the code above. In the console, you type **5.5** and press Enter. What happens?

- A) The value **5** is assigned to the variable **cost**
- B) The value **5.5** is assigned to the variable **cost**
- C) The value **5.5** is printed to the console
- D) The program will raise an Exception

2. (2pts) Which options describe what is happening in this line of java code? **SELECT ALL THAT APPLY**

```
x += 5.5;
```

- A) We are assigning the value **5.5** to **x**
- B) We are incrementing the value of **x** by **5.5**
- C) We are adding **5.5** to the current value of **x**
- D) We are initializing the value of **x** by **5.5**

3. (2pts) What happens if you compile and run this line of java code? `int myInt = (int) 5.7;`

- A) It declares the variable **myInt** with the initialization value of **5**
- B) It declares the variable **myInt** with the initialization value of **5.7**
- C) It declares the variable **myInt** with the initialization value of **"5.7"** (quotes are part of value)
- D) This code has an error and will not compile

4. (2pts) What happens if you compile and run this line of java code?

```
double myDub = Double.parseDouble("5.7");
```

- A) It declares the variable **myDub** with an initialization value of **5**
- B) It declares the variable **myDub** with an initialization value of **5.7**
- C) It declares the variable **myDub** with an initialization value of **"5.7"** (quotes are part of value)
- D) This code has an error and will not compile

5. (1pts) In Java, what is the result of **7 / 2** when both operands are of type **int**?

- A) 3.5
- B) 3
- C) 4
- D) 3.0

6. (1pts) Define: **Integrated Development Environment (IDE)**?

- A) The core part of the OS that directly manages hardware, memory, and processes
- B) A text-based interface for typing commands directly to the shell
- C) A software application that provides tools for writing, testing, and debugging code all in one place
- D) A visual interface with windows, icons, and menus that users interact with using a mouse/touch
